

PsyFi TMS
BEHAVIORAL HEALTH CLINIC

PSYFI PRESENTATION

Goal:

Develop a prototype of an app for PsyFi, a medical service provider, that will help to improve their patient's experience, primarily through using mental health tracking functions

USER TESTING (PERSONA)

Professional Background

Work Status: Part Time

Income: 75,000+

"I heard about PsyFi through a referral and was interested in their treatment options."

Personal Background

Age: 33

Status: Single with no children

Education: Bachelor's Degree

JESSICA SMITH

Scenario

"I originally came to PsyFi because of a referral and have been very happy with my treatment so far. I do wish communication was easier outside of appointments and there were some supplemental therapy opportunities."

User Environment

Work Location: Home/Hybrid
Devices Used: Laptop and Phone

Psychographics

- Was referred to PsyFi
- Was interested in new treatment methods
- Calls to ask questions and make appointments
- Doesn't understand the Patient Portal
- Might be interested in journaling

USABILITY TESTING

PsyFi TMS
BEHAVIORAL HEALTH CLINIC

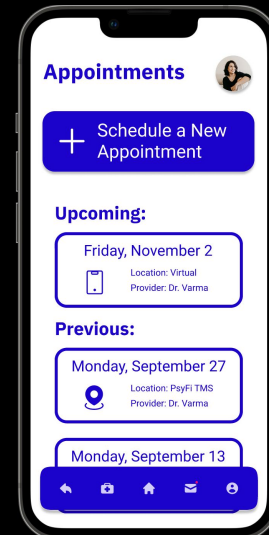

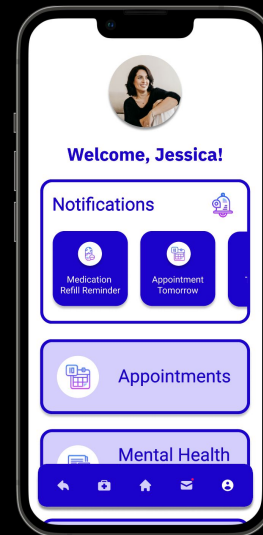

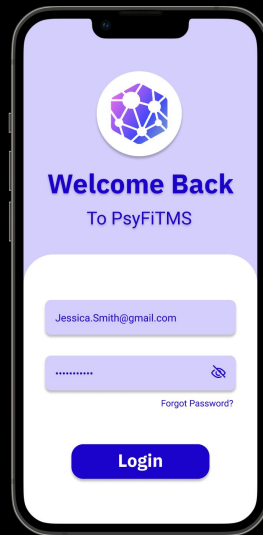

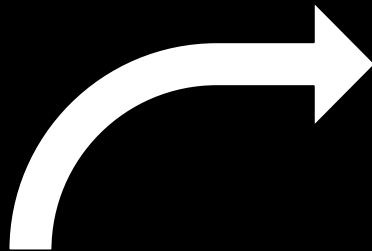

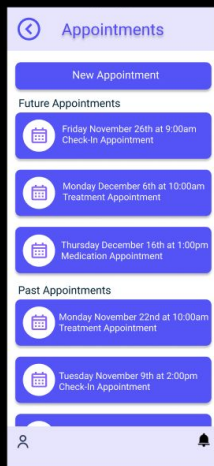

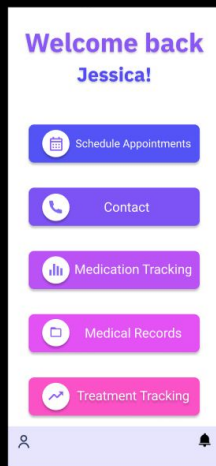

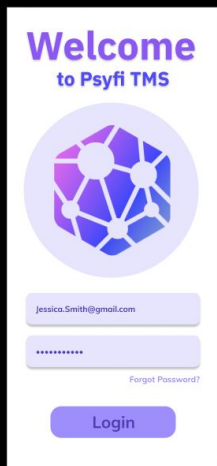

Feedback

- Overall easy to navigate
- Less colors is less distracting
- Modern and approachable design
- Some difficulties accessing patient profile
- Potentially make a separate notifications page
- Highlight journaling option
- Make sure hierarchy is clear
- Make sure website is consistent

FINAL PROTOTYPE
